

BLUE BIRD EXPLORERS

Travel Agency

Digital Travel Agency & Tourism Product Development

Complete Graduation Project / Projet de Fin de Formation

Market research • Branding • Product design • Customer persona
Website prototype • Operations • Project management • Finance

PROJECT POSITIONING

A consolidated professional version of the two original academic projects, preserving the real project evidence while improving structure, clarity and presentation.

Prepared by Amine Rachchad

Tourism Management - E-Travel Agency

Blue Bird Explorers - Digital Travel Agency Concept

A complete graduation project combining tourism strategy, product development, customer experience, digital travel and operational planning.

PROJECT OBJECTIVE

Create a credible digital travel-agency concept that moves from market analysis and positioning to customer-facing products and an operational delivery model.

FINAL IDENTITY

Blue Bird Explorers is used as the single final name. The project remains an academic concept/prototype rather than a claimed operating company.

PROJECT SCOPE

Strategy

PESTEL • SWOT • benchmarking

Brand

logo • colors • typography

Customer

persona • journey

Product

portfolio • itinerary

Digital

website • channels

Delivery

suppliers • operations • PM

WHAT WAS PRESERVED

- Original Blue Bird brand logic, distribution ideas, loyalty concept and early financial structure.
- Later project research, benchmarking, Business Model Canvas, detailed persona, customer journey, website prototype and project-management work.
- Original academic assumptions are labeled as assumptions; the final portfolio focuses on presenting the work clearly rather than pretending it was a live business.

PESTEL Market Analysis

The original analysis is retained as a decision framework rather than turned into unsupported market-data claims.

Political

Tourism policy, licensing, fiscal environment and national development objectives influence market confidence.

Economic

Inflation, exchange rates, purchasing power and travel demand affect pricing and profitability.

Sociocultural

Travel is increasingly linked to discovery, identity, authenticity and shareable experiences.

Technological

Online booking, social media, AI support and mobile-first behaviors reshape travel planning.

Legal

Consumer protection, data privacy, licensing and supplier contracts must be considered before launch.

Environmental

Responsible travel choices, local suppliers and lower-impact operations support long-term credibility.

STRATEGIC IMPLICATION

Blue Bird Explorers should avoid competing only on price. The stronger position is to combine ease of booking, authentic Moroccan experiences, transparent information and reliable local supplier delivery.

Digital-first demand

Trust & safety

Local authenticity

Responsible travel

SWOT & Competitive Positioning

Turning the original SWOT and benchmarking into focused decisions for the final agency concept.

STRENGTHS

Tourism management training • digital-first concept • lower initial operating cost • Morocco destination knowledge

WEAKNESSES

New brand with limited awareness • need for trusted suppliers • limited launch budget • dependence on digital visibility

OPPORTUNITIES

Tailored experiences • online planning • local partnerships • sports/events tourism potential

THREATS

Strong competitors • seasonality • price volatility • regulation and customer complaints

PERSONALIZATION

HIGH

POSITIONING CHOICE

STANDARDIZED

TAILOR-MADE

Positioned toward personalized travel rather than mass-market standardization.

BLUE BIRD EXPLORERS

Personalized • trust-led • digital

LOW PERSONALIZATION

HIGH

KEY MESSAGE

A differentiated, trust-led digital agency that simplifies personalized travel planning in Morocco.

Blue Bird Explorers - Final Brand System

The final identity keeps the winged-bird symbol and muted teal direction, with the requested Blue Bird Explorers name.

BLUE BIRD EXPLORERS

Travel Agency

PRIMARY COLOR

#283540 • Slate navy
Trust • professionalism • stability

SECONDARY COLOR

#5B9791 • Muted teal
Calm • discovery • nature

LOGO MEANING

The bird symbolizes freedom, movement, positive messages and new horizons - a visual metaphor for discovery and memorable travel experiences.

BRAND PERSONALITY

Simple, calm, trustworthy, inspiring and locally connected. The identity should feel closer to hospitality and guided discovery than aggressive e-commerce.

USAGE RULE

Use the complete Blue Bird Explorers lockup where the brand needs to be identified. The bird symbol can be used alone as a small icon, but it should not be placed as a decorative object in the middle of unrelated diagrams.

Calligraphy, Fonts & Interface Usage

The original calligraphy choices remain part of the project evidence, clarified into a readable brand system.

HEADINGS - CHARM TH

Original heading choice. Used for distinctive brand moments and titles where the objective is to feel memorable and travel-inspired.

BODY - KG PRIMARY

Original body-font idea. For this professional portfolio, clean body typography is used where recruiter readability matters most.

BRAND APPLICATIONS

Digital Header

Complete lockup + clean navigation

Product Card

Destination • description • price • CTA

Supplier Sheet

Consistent internal information

Trip Material

Clear customer-facing documents

TYPOGRAPHY PRINCIPLE

Decorative calligraphy adds identity; functional typography protects readability. Long product, operational and financial information should always remain simple and easy to scan.

Detailed Customer Persona - Ismail

A fictional target persona based on the project logic. No real face is used.

PROFILE

28 years old
Morocco
Digital entrepreneur
Medium to high income
Arabic, English, French

ISMAIL

The Explorer Seeker

BIO

Passionate about travel and discovery.
Plans online, compares reviews and looks for reliable experiences that are easy to organize.

NEEDS

Clear information
Fast booking
Secure payment
Personalized options
Responsive support

GOALS

Discover new places
Live local experiences
Optimize budget
Share experiences online

PAIN POINTS

Complicated booking
Unclear prices
Slow replies
Unreliable reviews
Information overload

PREFERRED CHANNELS

Instagram • WhatsApp • Google Search • Email • mobile-friendly booking pages

QUOTE

"I look for authentic, well-organized experiences without stress."

PROMISE TO ISMAIL

Authentic trips that are easy to organize and memorable, with trustworthy support at every stage.

Customer Journey & Booking Flow

A single flow from inspiration to loyalty, connected to the website and service support.

EXPERIENCE PRINCIPLE

Every stage should reduce uncertainty: clear information before booking, reliable coordination before departure, responsive support during travel and a structured feedback loop after return.

How Blue Bird Explorers Creates and Captures Value

The original business model is kept detailed, but reorganized for fast reading.

KEY PARTNERS

Local guides • accommodation • transport • activity providers • travel platforms

KEY ACTIVITIES

Itinerary design • booking support • supplier coordination • customer service • digital marketing

VALUE PROPOSITION

Authentic tailored trips • simple secure booking • local experiences • support

KEY RESOURCES

Online platform • supplier database • content & guides • qualified team

CUSTOMER RELATIONSHIPS

Personalized advice • fast support • feedback • reviews • loyalty

CUSTOMER SEGMENTS

Individuals • couples • families • groups • business travelers • international tourists

CHANNELS

Website • social media • Google/SEO • email • partners

REVENUE STREAMS

Packages • commissions • activities • extras • affiliations

BUSINESS LOGIC

Build demand through digital channels, convert enquiries through consultation, package reliable supplier services, then improve repeat business through service quality and loyalty.

Commercial Offer by Experience Family

The original offer is organized into clear customer-friendly product families.

Adventure & Sport

Quad • hiking • cycling • surf • climbing • desert activities

Culture & Heritage

Marrakech • Fes • Rabat • medinas • monuments • artisans

Nature & Desert

Sahara • Merzouga • valleys • Atlas • eco-lodges • outdoor stays

Gastronomy

Cooking classes • local markets • tastings • food-led experiences

Wellness

Hamam • spa • yoga • slower restorative experiences

Tailor-made Trips

Circuit + stay + transport + local experiences combined to customer needs

PRODUCT-DEVELOPMENT CHECKLIST

- Define target customer and experience objective.
- Build itinerary and service sequence.
- Source suppliers and compare standards, capacity and conditions.
- Cost all components and define selling price, inclusions and exclusions.
- Create customer-facing description and internal operational notes.
- Test booking flow and gather feedback for improvement.

Representative Experiences & Academic Price Ranges

Original offer-table examples are retained. Prices are project assumptions, not current quotations.

Category	Experience	Original academic price
Sport	Quad in the Sahara	1,000-1,500 MAD
Sport	Surf lesson in Taghazout	600-1,000 MAD
Culture	Guided Marrakech medina visit	400-700 MAD
Nature	Camping in Merzouga desert	1,200-1,800 MAD
Gastronomy	Moroccan cooking workshop	500-800 MAD
Wellness	Spa / hammam in Essaouira	800-1,200 MAD
Nature	Birdwatching at Khnifiss	700-1,000 MAD
Craft	Pottery workshop in Safi	400-700 MAD

IMPORTANT

These are original academic price assumptions. A real launch would require live supplier contracting, seasonality rules, commissions, taxes and margin validation.

ADDED-VALUE IDEAS FROM THE FIRST PROJECT

Rich travel videos to explain experiences before booking • loyalty points for repeat purchase • customer reviews and social proof to strengthen trust.

7-Day Morocco Discovery

A practical example showing how a tourism idea becomes an itinerary and sellable package. Cost figures remain illustrative.

TARGET

Couples or independent travelers seeking culture, desert and Atlas experiences.

ROUTE

Marrakech → Atlas → Aït Ben Haddou → Dades → Merzouga → Ouarzazate → Marrakech

PROMISE

Balanced Morocco discovery with reliable logistics and local experiences.

D1	Marrakech	Arrival, orientation & medina
D2	Atlas Mountains	Village experience & scenic transfer
D3	Aït Ben Haddou / Dades	Kasbah & valley route
D4	Merzouga	Desert arrival & camp
D5	Merzouga	Local activity & exploration
D6	Ouarzazate	Scenic return via valleys
D7	Marrakech	Departure / onward travel

ILLUSTRATIVE COSTING PER TRAVELER

Accommodation 2,100 MAD • Transport 1,350 • Activities 750 • Guide/support 600 • Meals 450
Operating cost: 5,250 MAD • Target margin: 20% • Proposed selling price: 6,300 MAD

Website Prototype - Home & About

The original website screens are preserved as real project evidence, not replaced by generic mockups.

HOME - navigation, search and experience-led discovery

ABOUT - brand story and trust-building content

UX PURPOSE

Home creates first interest through discovery and product previews. About builds credibility around the brand story and the people behind the concept.

Website Prototype - Products & Contact

The prototype supports the booking flow from discovery to enquiry.

PRODUCTS - compare experiences and price positioning

CONTACT - direct details, social channels and enquiry form

UX REQUIREMENTS

Responsive navigation • clear descriptions and visible pricing/inclusions • search/discovery • reviews and trust content • fast contact • future path to online booking and payment.

How the Concept Attracts, Converts & Retains Travelers

A hybrid model combining owned digital channels, partner reach and direct customer relationships.

What the Concept Needs Behind the Website

The customer experience depends on a reliable network of public, financial, supplier, technology and commercial stakeholders.

RESOURCE REQUIREMENTS

- Customer service / reservations
- Product and supplier administration
- Digital marketing / content / SEO
- Web and technical support
- Finance and administration
- Computers, reliable connectivity, communication tools and secure data storage

From Product Setup to Post-Trip Review

The service-delivery system that turns a digital enquiry into an actual trip.

PRODUCT SETUP

Research → supplier selection → contracting / conditions → costing → content → booking rules

BOOKING REQUEST

Customer need → availability → quote → confirmation → payment / documentation

PRE-DEPARTURE

Reconfirm services → final traveler information → supplier notes → operational handover

DURING TRIP

Coordinate suppliers → handle changes / issues → maintain customer support

POST-TRIP

Collect feedback → resolve issues → review supplier / product performance → improve content

SUPPLIER DATA TO MANAGE

Contact & responsible person • service description & capacity • contracted rates / seasonality / taxes • cancellation & payment conditions • availability process & deadlines • quality notes • operational instructions • emergency contacts.

Quality Control Before Selling Experiences

Supplier decisions balance price, reliability, safety, terms and customer value.

SUPPLIER WORKFLOW

SUPPLIER DATA TO MANAGE

Preferred suppliers are selected on quality, reliability, terms, safety and customer impact - not price alone.

From Concept to Launch Preparation

The later project introduced structured delivery methods beyond a traditional business plan.

KEY WORKSTREAMS

Clear Ownership for Implementation

Responsibilities and communication are treated as project controls, not afterthoughts.

Project Lead / Founder
Strategy • plan • product • supplier negotiation

Web Developer
Website • booking interface • technical support

Designer / Content
Visual identity • product content • social assets

Operations Lead
Supplier data • availability • confirmations • delivery

Finance / Admin
Budget • invoices • payments • reporting

Marketing Lead
SEO • social • campaigns • newsletters

SIMPLIFIED RACI LOGIC

Task	Responsible	Consulted	Informed
Feasibility	Project Lead	Operations / Finance	Team
Website prototype	Developer	Designer	Lead
Supplier partnerships	Project Lead	Operations	Finance
Marketing launch	Marketing	Designer / Lead	Team
Budget tracking	Finance	Project Lead	Team

Key Risks & Practical Controls

Original project risks are retained and converted into clear mitigation actions.

Regulatory / licence delay

Start the licensing path early and use official requirements before launch.

Budget overrun

Use supplier quotations, contingency, staged commitments and budget tracking.

Supplier / capacity risk

Build alternatives, service standards, confirmation deadlines and performance records.

Technology / data risk

Secure hosting, backups, access controls, privacy compliance and testing.

Schedule slippage

Detailed plan, dependencies, owners and milestone reviews.

Reputation risk

Accurate information, fast issue handling, quality control and transparent reviews.

Commercial risk

Test acquisition channels, track conversion and avoid dependence on one platform.

CONTROL MINDSET

A travel product is only strong if operational, commercial and customer risks are anticipated before the traveler experiences them.

Academic Financial Model - Clearly Labeled

The source figures are preserved where useful. The arithmetic inconsistency in the original result row is shown with corrected calculations.

145,000 MAD

working capital

197,590 MAD

fixed / start-up assets

342,590 MAD

total requirement

THREE-YEAR OPERATING ILLUSTRATION

Period	Revenue	Operating costs	Corrected result
Year 1	236,000	186,000	50,000
Year 2	431,000	267,000	164,000
Year 3	618,800	344,000	274,800

INTEGRITY NOTE

These are academic estimates, not current market quotations or actual company performance. A real launch model would also require taxes, supplier margins / commissions, cash-flow timing, cancellations, payment fees and seasonality scenarios.

OPERATING RESULT GROWTH

KPIs & Responsible Travel Framework

What should be measured after launch, and how the concept can protect customer and local value.

What this project demonstrates

A single view of the practical capabilities evidenced across the graduation project.

Tourism Product Development

Product architecture, itinerary design and pricing logic

Market & Strategy

PESTEL, SWOT, benchmarking and business-model thinking

Customer Experience

Persona, journey, booking flow and trust requirements

Supplier & Operations

Partner mapping, supplier data and booking workflow

Digital Travel

Brand identity, website prototype and distribution strategy

Project Management

Roadmap, stakeholders, RACI and risk assessment

Financial Feasibility

Budget structure, revenue logic and corrected projections

Problem Solving

Consolidating incomplete work into one coherent final concept

Research + product + operations + digital + project management - connected as one tourism business concept.

What This Project Demonstrates

A recruiter-facing summary of the actual capabilities shown across the complete graduation project.

Research & Strategy

PESTEL • SWOT • benchmarking

Tourism Product

Product families • itinerary • pricing logic

Customer Experience

Persona • journey • booking flow

Supplier & Operations

Partner data • workflow • quality

Digital & Marketing

Brand • website • distribution

Project Management

Planning • RACI • risks

Business Development

BMC • feasibility • revenue logic

Problem Solving

Consolidating and improving unfinished work

LINKEDIN PROJECT TITLE

Blue Bird Explorers - Digital Travel Agency & Tourism Product Development

SHORT DESCRIPTION

Designed an end-to-end digital travel agency concept focused on personalized Morocco experiences, combining market analysis, brand identity, customer journey design, tourism product development, supplier and operations planning, website prototyping, digital distribution, project management, risk analysis and financial feasibility.

FINAL POSITIONING

An academic concept and prototype demonstrating practical end-to-end tourism, product, digital and project-management thinking.
